The Direction of the Ecole polytechnique fédérale de Lausanne hereby adopts the following:

**Section 1  Definition and guidelines**

An inflammable may be a pure substance or a mixture.

1 Physical separation (in separate storage cabinets) according to chemical incompatibilities (see table in annex) must always be respected during storage.
2 Items must be stored in ventilated cabinets of the EI90 type (EN-14770-1 certified).
3 All liquids must be stored in sealed containers.
4 These sealed containers shall be stored inside retention tanks.

**Article 1  Storage**

1 The storage of inflammable liquid in non-ventilated premises is prohibited.
2 In ventilated premises, inflammable liquids must be stored in ventilated cabinets, in containers with a maximum volume of 3 litres.
3 A maximum quantity of 15 litres of inflammable liquid is authorised outside of ventilated cabinets.
4 A maximum quantity of 100 litres of inflammable liquid is authorised inside the laboratory’s fire-resistant ventilated cabinets (metallic, chipboard).
5 A maximum quantity of 150 litres of inflammable liquid is authorised inside fireproof ventilated cabinets of the EI90 type (EN-14770-1 certified).

**Article 2  Waste**

1 Chemical waste must be stored in accordance with the conditions regarding inflammable liquids (see Article 1 of the present directive).
2 Waste containers must be taken to your School’s chemical waste collection point at least once every two months, or when the containers reach 80% of their capacity.

**Section 2  In case of accident**

**Article 3  Alarm**

Call 115 (or 021.693.30.00 from a mobile telephone) immediately and gather information concerning the product or mixture that caused the accident.

**Section 3  Final provisions**
